

Genasys™ Command & Control

Critical Communications with
Real-Time Situational Awareness

Who Needs Help & Who is Ok?

Genasys Command & Control assists emergency personnel track and quickly respond to alert replies from hundreds, thousands or even millions of people during disasters and other critical events.

Easy to Use Graphic Interface

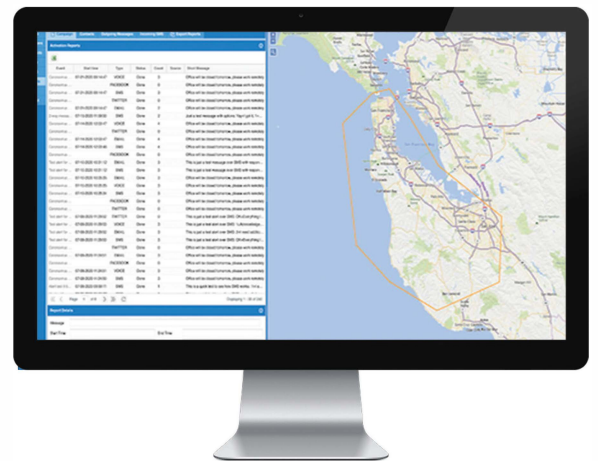

The easy-to-use graphic interface tracks the percentages of alert recipients reached, recipients that replied and alert completion. This information is critical in ensuring alerts are received and in targeting and allocating life-saving resources to those who need them.

HazardSense™ Intelligent Sensor Integration

Genasys' HazardSense fully integrates with sensors or monitoring devices to enable operators to receive critical information and alerts from a variety of sources, including gunshot detection, fire cameras, wind, flood and earthquake sensors, CCTV, agency alerting (IPAWS) and more. The intuitive, easy to use HazardSense interface provides full visibility and control over multiple sensors

Multi-Channel, Multi-Agency Alerting

Send alerts to multiple output channels simultaneously from a single dashboard. Combine Mobile Alerts with Sirens, TV, Radio, Social Media, and industry-leading Genasys Voice Broadcast Arrays.
